

Community Issues Caused by Technology

Creating a Presentation

Step 1: Mind Map

1. Identify one negative impact technology has had on our society.
2. Consider a creative way to introduce your issue
 - a. Find at least one credible internet source that talks about your issue
 - b. Summarize information from that source that could be a good introduction.
3. Give several (at least 3) applications of your issue
4. Consider a way that technology could be used to help your issue

Prezi Assignment

5. Create a Prezi to present that issue to the class
6. End the Prezi by showing or suggesting how the technology (or a different technology) could be used to fix the problems caused.
7. Your Prezi should have the following
 - a. A minimum of 10 “slides”
 - b. At least one graphic organizer (e.g. bar graph, Venn Diagram, line graph, pie chart, etc...)
 - c. At least one picture (either cited properly or taken by you)
 - d. A theme that matches your topic (either a template from the website or one you made yourself)
 - e. Appropriate animations that fit your topic

Your presentation should take between 2 and 5 minutes in total.

If you use a video or sound byte in your presentation, it should also fit within the allotted time.
